

Contents :

Study on the static properties and energy evolution mechanism of rock-concrete composites	01-07
Enhancing 5G-NR mm Wave: Phase Noise Models Evaluation with MMSE for CPE Compensation	08-23
Optimization of Equipment Installation Processes in Large-Scale Oil and Gas Engineering Projects	24-40
Conceptualizing Scalable Web Architectures Balancing Performance, Security, and Usability	41-47
Software Entrepreneurship in the Digital Age: Leveraging Front-end Innovations to Drive Business Growth	48-54
Ensuring Well Integrity in Oil and Gas: Advanced Engineering Practices and Technological Innovations	55-67
Health, Safety, and Environmental Management in High-Risk Industries: Best Practices and Strategies from the Oil and Gas Sector	68-77
Zero field splitting parameter and energy levels of Mn ²⁺ in LiAl ₅ O ₈ single crystals	78-83
Integration and Innovation: An A disciplinary Approach to Scientific Education for the Environment	84-91
Evaluation of Performance and Safety Practices in the Oil and Gas Industry: A Case Study of Network Exploration and Production	92-102
A Robust Hybrid Digital Color Image Watermarking Scheme	103-111
Enhancing Fire Safety: The Evolution and Impact of Fire Fighting Robot	112-118
Real Estate Price Prediction in Abuja, Nigeria Using Linear Regression	119-125
Design of an Optimized Pi Controller Converter for Integrating Renewable Sources to Grid System	126-140
A Unified Power Quality Conditioner (UPQC) In Distribution Network	141-150
