

Contents :

Load Forecasting for Improved Performance of Rumuola 33/11 kV Distribution Network using the Artificial Neural Network	418-435
Performance evaluation of Nickel oxide catalyst in a Primary Reformer	436-446
Performance Evaluation O F A Bioreactor for The Treatment of Produced Water (A Case Study of Crude Oil Dehydration at Kula Flow Station)	447-459
Limitations and Applicability of WRC 107/537, WRC 297, and WRC 368 for Nozzle Load Evaluation in Pressure Vessels	460-467
Global Application Patterns of 4D BIM in Construction: Sectoral Variation by Scale, Complexity, and Risk	468-475
Assessment of Chemically Treated Produced Water for Irrigation	476-482
Simulation of Waste to Energy Plant Using Flue Gas from Fluid Catalytic Cracking Regenerator	483-498
Innovative Achievements and The Conferral of the Omega Title	499-500
The Greek AI Designation Framework	501-503
Mapping And Analysis of Drainage Systems for Flood Mitigation Along Tetlow Road, Owerri Municipal Council, Imo State, Nigeria Using Gis and Remote Sensing Techniques	504-510
